

Extension activity 1

Sanitizer Preparation and Distribution

On 20th March 2020, the chemistry department organized an extension activity of sanitizer preparation to prevent the spread of novel COVID-19 disease. The participants prepared about 30 litres of hand sanitizer following WHO protocol and distributed among the students, staff and neighbouring communities. The participants also explained Do's and Don'ts' to make people aware about the Corona Virus and precautionary measures to be taken during the present situation.
