

Wall magazine

Theme: Green chemistry

Date: 11.06.2022

Number of participants: 21

Report: The students were keen to highlight a cross-cutting issue regarding chemistry for this session wall magazine competition. Green chemistry was chosen as the theme considering its importance in contemporary times. In the magazine, the attention was drawn towards the need for green chemistry as well as its principles to curb the enormous effects of industrial evolution on our planet. The students were all participated in the whole preparation of the magazine.
