## ABSTRACT

Nowgong Girls' College is a premiere institution of higher education for women in central Assam. It has been continuing its glorious journey since 12th September 1962. The Campus is characterized as a biodiversity hub with numerous herbs, shrubs and trees of Angiospermae and Gymnospermae. The present study has revealed that the rich diversity of plant species of about 123 species (57 herbs, 26 shrubs, 36 trees, 09 climbers, 09 aquatic plants, 07 epiphytes) belonging to various families and are having various medicinal properties. More plantation

### **Keywords:**

Floral diversity  
Angiospermae  
Gymnospermae  
Indigenous

of some indigenous plants is required for better result of floral diversity. ■
